CLEAN AIR
GLO

Do You Think The Indoor Air You Breathe Is Safe?

Certain spaces in your home such as the kitchen, bathroom, garbage and laundry areas start developing unpleasant odours over a period of time. Other chores in and around the house can lead to emission of foul smell. Usually, wherever there is a foul odour there are minute disease causing airborne particles which you invariably end up inhaling, and enough of those may impact your body.

CLEAN AIR **GLO**

Heal Your Indoor Environment

Aeroguard Clean Air GLO cleans indoor air by releasing a large number of negative ions. These ions chemically react with harmful pollutants and disintegrate them, thus providing a refreshing healthy indoor environment.
